Tasks assigned to each team member

- **Matthew Iannantuono**
  - [Scrum-14](): Create endpoints to interact with MongoDB
  - My task this sprint is to create our backend endpoints to add and modify user information, as well as add new washroom locations, or retrieve information about all or a single washroom.
- **Victor Yeung**
  - [Scrum-10](): Create a blank app with empty settings tabs, info tab, and explore tab
  - I was tasked with creating the initial app with multiple tabs so that details and functionalities could be added to the pages.
- **Ethan Lam**
  - [Scrum-12](): Recreate Settings - My Profile
  - My task is to create the Settings page and include the My Profile part, allowing users to access and set their profile.
- **Chang Ma + Theo Landart**
  - [Scrum-13](): Re-create the blank map
    - We created a map API using leaflet and it shows a blank map that can indicate location by using geographical coordinates
  - [Scrum-15](): Add washrooms to the map
    - Using the implemented map, we connected the MongoDB endpoints to the map on the frontend to show all the maps in the area
- **Tianxi Hu**
  - [Scrum-11](): Re-create the info page
  - Create the donate button that leads to website so user have access to the information regarding donation

Summary of each standup meeting

- **Feb 19th**
  - Setup Git Repo and Jira project
  - Identify tasks (more specific than the deliverable 1 user stories)
- **Feb 20th**
  - Identify work distribution (difficulty of each task)
  - Assign tasks to each person
- **Feb 21st – Feb 23rd**
  - Daily updates on everyone's progress
- **Feb 26th**
  - Longer meeting to summarize everything so far
- **Feb 27th – Feb 29th**
  - Daily updates on everyone's progress
- **Mar 1st**
  - Finished deliverable 2 document/sprint retrospective meeting

Summary of the sprint retrospective meeting

During the beginning of the sprint, we spent most of the time setting up our GitHub repository, Jira project, and deciding on tasks. We wanted to plan for the future properly. In the end, we were able to recreate basic features of the GoHere app that we need to make the required upgrades later on. Additionally, we started working on the map functionality. We planned well during this sprint but we could have worked together more and had longer meetings, which we will be sure to do for the next sprint.
